

## Shock-Freezing Penetrating Lubricant

Extremely cold spray shrinks metal by Cryo-Action™, opening interfaces to allow lubricant to penetrate deeply into seized and corroded nuts, bolts, pins, hinges and studs

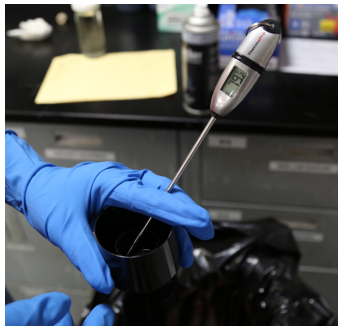

### **BENEFITS:**

- Non-conductive
- Safer, non-chlorinated
- 360° spray-anyway valve
- Starts working in seconds
- Shields against renewed corrosion
- Succeeds where conventional penetrants fail
- Works well on sliding and rotating parts that are stuck

### **USES:**

- Use around marinas, oil rigs, factories, automotive repair centers, manufacturing plants, machine shops, and anywhere corrosion is a big problem
