

MOUNTAIN FRESH AEROSOL

Description:

A blend of odour neutralizing chemicals which eliminates odours through a chemical process. Instead of masking or covering up the bad odour, Mountain Fresh aerosol traps odours and locks them into an odourless form. The strong mountain fresh fragrance masks odours while the neutralizing agents take effect. This is a perfect product to use in industrial areas where odour control is a concern including dumpsters, compactors, loading docks, open waste, recycling plants, drainage and restrooms.

Benefits:

- * Dry fogging aerosol masks odours instantly, then traps and neutralises the odour permanently
- * Destroys odours caused by Organic Waste and Decomposition

Effective Against these smells:

URINE - MERCAPTONS - HYDROGEN SULFIDE

FOOD WASTE - SMELLY ACIDS - THIOETHERS

AMMONIA - CIGARETTE SMOKE - AMINES

PET ODOURS - ANIMAL WASTE

Applications:

For Dumpsters and Garbage Cans: Spray area with a mist. Repeat when odour returns

For Restrooms: Spray around toilets, urinals and floors

For space spraying: Spray manually by holding down nozzle and pointing aerosol outwards.
